

Introducing AntiCancer's fluorescent protein-expressing cancer cell line collection

Now available for purchase!

Examples of cancer cell lines available

Prostate cancer PC-3-RFP

Glioma U87-RFP

Breast cancer MDA-MB-435-GFP

Pancreas cancer MIA-PaCa-2-RFP

Dual-color imaging

Glioma U87-RFP and GFP

Imaging in microvessels and capillaries

Fibrosarcoma HT1080-GFP-RFP

GFP tumor in RFP mouse

Colon cancer HCT-116-GFP

RFP tumor in GFP mouse

Colon cancer HCT-116-RFP

RFP tumor in BFP mouse

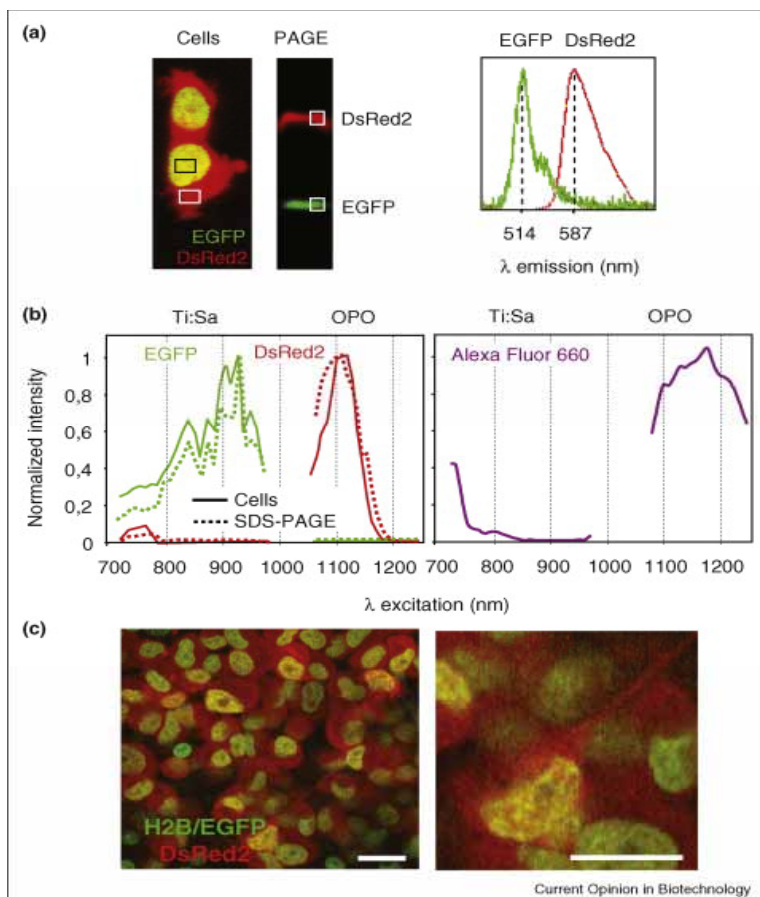

Pancreas cancer XPA1-RFP

For pricing and ordering information, please contact Li Tang or Charlene Cooper by email at all@anticancer.com

Available fluorescent protein-expressing cancer cell lines

TUMOR TYPE	CELL LINE	GFP	RFP	Dual-color	TUMOR TYPE	CELL LINE	GFP	RFP	Dual-color

Example of a dual-color fluorescent protein-expressing cancer cell line

(a) HT-1080 cells expressing cytoplasmic DsRed2 and Histone-2B-EGFP before and after SDS-PAGE under native conditions. The square boxes indicate the regions where the spectra were taken from. **(b)** 2-photon excitation spectra of EGFP, DsRed2, and Alexa Fluor 660. The solid lines represent the isolated protein in SDS-PAGE or soluble Alexa Fluor 660 and the dashed lines living dual-color cells. The calculated efficiency to excite DsRed2 at 1100 nm was 20-fold higher compared with excitation at 760 nm. **(c)** Simultaneous excitation of EGFP at 830 nm and DsRed2 at 1100 nm in live, non-fixed HT-1080 dual-color cells. Bars, 20 μ m. (Andresen V, et al. *Curr Opin Biotechnol* 20, 54-62, 2009).
