UVP Exhibits New iBox Spectra Imaging System at Neuroscience 2009

October 2009

UVP, LLC will exhibit at Neuroscience in Chicago, Illinois from October 18 – 21, 2009 to showcase the new iBox® Spectra Small Animal Imaging System along with UVP's extensive line of Biolmaging Systems, Ultraviolet Products and Laboratory Products.

- The iBox® Spectra Imaging System joins the iBox Scientia in revolutionizing in-vivo imaging. UVP now offers two systems for real time, non-invasive imaging to speed up basic and preclinical research studies in tumors, oncology, heart and metabolic diseases. The iBox Spectra is designed with leading-edge color camera technology enabling quick detection, image capture and high throughput of multiple research animals.
- UVP's line of Biolmaging Systems includes the BioSpectrum® multifunctional imaging systems which combines a high resolution CCD camera and advanced features for enhanced imaging fluorescent and chemiluminescent imaging capabilities.
- Ultraviolet products to be featured at Neuroscience include the HEPA/UV3 PCR Cabinet which provides maximum contamination control with the efficient, effective filtered and sterilized air. The unit supplies a four-stage filter system along with three shortwave 254nm UV for thorough sterilization and decontamination.

To see all of UVP's product offerings, visit UVP's booth 524 or go to uvp.com for more information. UVP's products are available through a world-wide distribution network.

About UVP, LLC - UVP is a global leader in life science imaging, supplying imaging systems for academic, biopharmaceutical and biotechnology applications. With core expertise as the leading developer and manufacturer of ultraviolet products since 1932, UVP continues to provide innovative products and specializes in fluorescence imaging applications for the life sciences. The organization provides comprehensive service and support to customers and dealers worldwide. UVP's headquarters and manufacturing operations are located in Upland,

California. European Operations, Ultra-Violet Products Ltd., is headquartered in Cambridge, England. For additional information, go to www.uvp.com.
